“Home Begins At The Door”

About Us

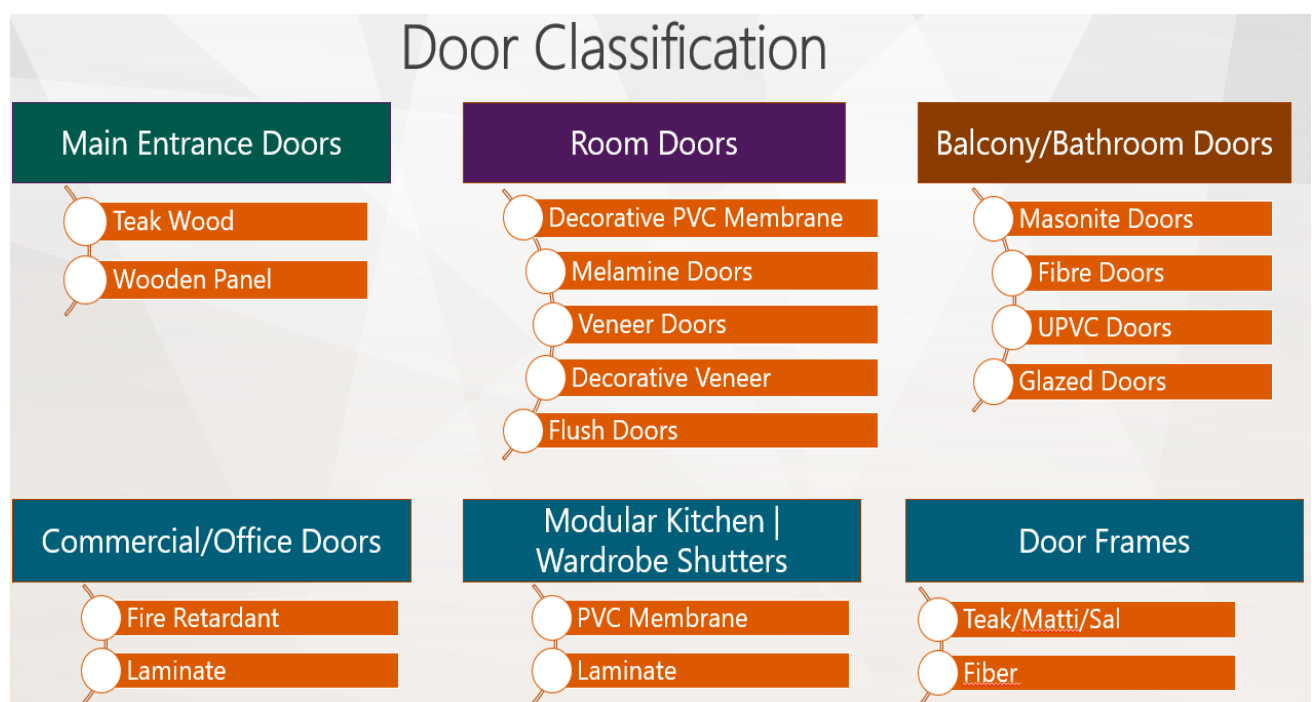

We at Saikripa aim to provide you with the right doors for your homes which are aesthetically pleasing, functionally apt and are of superior quality which will last you for years. We believe that home is where your story begins and the door is the cover page. Sai Kripa Enterprise provides a wide range of doors for main entrance, rooms, bathrooms, balcony, and offices.

We are the **proud Distributors of Niki Doors** in Goa.

With a rich experience in timber and its by-products, we have a State-of-the-art Showroom in Goa. The vast acceptance of the products by renowned architects, builders and end consumers is a testimony to our unrelenting commitment to quality products.

We are proud to be associated with the products of world’s leading manufacturer of Moulded Door Skins, M/s Masonite International, USA, & M/s Promat of Belgium, the world leader in Fire Systems as our OEM partner for the manufacture of Fire Retardant Doors with Wooden Frames. Our pursuit has been to offer products of International standards to meet local climatic conditions.

1. FLUSH DOORS

Basic flush door

Flush Doors are kiln-seasoned & chemically treated to make them **dimensionally stable, termite resistant, fungi free & weather proof.** The flush doors have a solid Block Board Core with **BWP Grade** cross bands & face veneers which are PF bonded in Hot Press Process with high temperature making them **100% Boiling Water Proof.** They are also available in One Side & Both Side Teak as well as design options

2. DECORATIVE VENEER DOORS

Product SDK-9

Decorative Veneered Doors offer the visual beauty and refinement of natural wood doors. All flush doors are available in both solid as well as other filler materials, manufactured as per customer specifications. Protected with a high quality topcoat, these doors are extremely durable and simple to maintain. These doors are made of teak & non-teak designed veneers overlaid on Solid Core Flush Doors. They are suitable for homes, offices, hotels, hospitals & commercial establishments.

12. LAMINATED DOORS

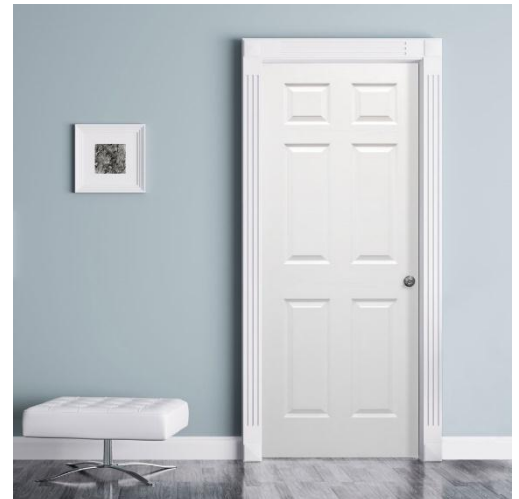

Lamination is a process of pasting a laminated sheet with heat and pressure. It is intended to give a long life to the ply or the material beneath. The substance used for the process increases the features as well as durability of the door. The door undergoes the process of lamination with equal mechanic pressure and bonding against the traditional time consuming manual process on site. A strong, hygienic and waterproof material, laminate offers countless options in terms of finish and colour. In fact, you can

13. FIBER DOORS

Fiber-reinforced plastic (FRP) is a composite material made of polymer matrix reinforced with fibres. These are 100% waterproof, extremely light, long-lasting, termite and pest proof and are best suited to resist extreme climatic conditions. Recommended for use in bathrooms, balconies

14. TEAK WOOD DOORS

We provide the finest African- Sudan, Tanzania, Ghana teak wood doors, with extraordinary craftsmanship and design. Each door is custom made. Price is determined by size, design, complexity and details of carving as the work is done by hand.

“Happiness often sneaks in through a door
you didn't know you left open”
